DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Species I, claims 1-19, in the reply filed on 5/4/2004 is acknowledged. The Applicant submits that independent claims 20 and 28 include all the limitations of claim 1. The argument is convincing, therefore, previous restriction has been withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sperr Jr. et al. (U.S. Patent Number 4,851,162).

Sperr Jr. et al. disclose an evaporator cooler. Referring to Figs.6,10-12 and 15-16, the cooler comprises housing 145, bottom 147, right and left sides 148 and front and real sides 149. Sides 148 are provided with inlet openings 150 and fitting with pad frame assemblies. Blowers means 38 is mounted within housing 145. Shroud 67, which envelops pad 52, is generally box-like having upright element 68, upper and lower horizontal elements 69 and 70, respectively, and upright elements 72 and 73. A plurality of water delivery apertures are spaced along conduit 98. Air could be discharged at different direction as shown in Figs.12,15 and 16. The evaporative cooler can be mounted upon a building or other structures or adapted for attachment to an upright surface.

In regard to the length and width ratio, the applicant should note that a change in the shape of a prior art device is a design consideration within the skill of the art. In re Dailey, 357 F.2d 669, 149 USPQ 47 (CCPA 1966).

In regard to the change of motor size, length, width and capacity, a change in size/capacity is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

In regard to two motors, the addition of duplicate parts to the apparatus is not the type of innovation for a patent to be granted. *St. Regis Paper Co. v. Bemis Co., Inc., 193 USPQ 8, 11 (7th Cir. 1977)*. Also, a change in size/capacity is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

In regard to the arrangements and structures, these are the design choice based on the cooler size, internal space, strength, usage, installation and appear.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-28 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11-16 of copending

Application No. 10/612,623. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications claim evaporative housing, blower, two pads and water distribution system.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Leyland (U.S. Patent Number 4,312,819) is made of record as relevant prior art.
